Water and Energy Usage Around the World.

Dr. Holger Meyer was born and raised in Germany. He is a board member of the Global Learning Center and Associate Professor and Director of Physics at Wichita State University where his research focuses mainly on experimental particle physics. He also has been interested in ecosystem destruction, habitat loss and extinction of animals large and small, anthropogenic climate change, and resource availability, social justice, poverty, and war around the globe.

Tonight's presentation will center on water and energy availability and usage around the globe. Dr. Meyer will share some data and ideas and also leave time for discussion.
